

Rubber Sheets

We are engaged in providing an entire range of Rubber Sheets and keep innovating them based on current market trends and expectations. These are precision engineered, designed and developed to several industrial requirements. They can also be customized as per client specifications.

Nitrile Rubber Sheet

We also engage in providing our clients with a comprehensive assortment of **Nitrile Rubber Sheet**. The products that we provide to our customers are fabricated using high-grade raw material and are in compliance with industrial standards. These products are known for their functional life, optimum quality and excellent resistance to temperature & petroleum based fluids. Owing to the quality, these products are extensively used in various industrial and automotive applications. These sheets are offered to our clients at the most economical price rates.

Features:

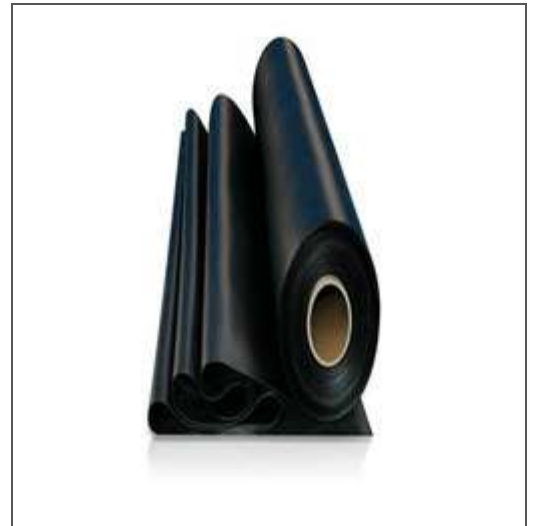

- Commendable durability
- High strength
- Smooth finishing

Neoprene Rubber Sheets

We are one of the leading suppliers of an impeccable range of **Neoprene Rubber Sheets**. These products are fabricated in compliance with I.S., B.S., & ASTM D 2000 norms by employing high grade raw material. These high-grade products are provided to our clients at market leading prices.

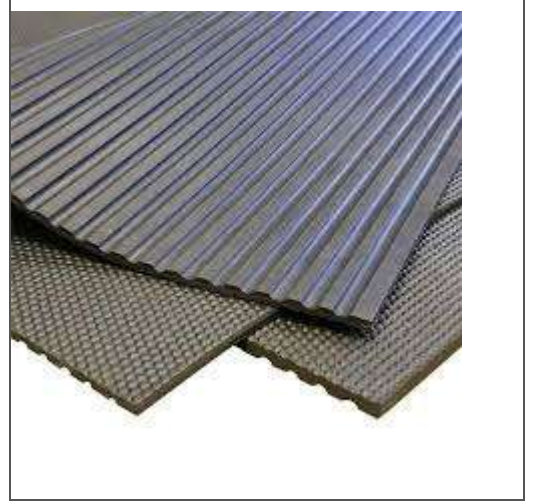

These products are offered to our clients in the following specifications:

- Neoprene blended synthetic rubber sheet
- Commercial quality neoprene rubber sheet – 100%
- Neoprene (100%) synthetic rubber sheet

Rubber Flooring Sheet

Rubber flooring is ideal for home and professional athletic installations. Use rubber floor mats for weight rooms, gym floors, playground surfaces, dog play areas, equine or horse stalls and barns, basement floors and areas around ice rinks. Rubber floors also work well for decks, patios and rooftops. High quality rubber floors are popular for indoor and outdoor installations, and are available in mats, rolls and interlocking tiles. Using rubber floor materials can also contribute to reducing your carbon footprint as most rubber used in flooring is made from recycled materials.

EPDM Rubber Sheet

We are among the pioneers in the industry for manufacturing and trading EPDM or Ethylene Propylene Diene Monomer Rubber Sheets has an excellent operating temperature range of -45°C to 120°C . It is highly recommended for out-door uses as it extremely resistant to oxidation, U.V. Rays and Ozone. However, EPDM does not have a good oil resistance or adhesion properties. It is resistant to many chemicals and solvents and shows a good resistance to many corrosive chemicals. It is also used for roofing sheets and weather strips. Specifications: Width: 1.2 Mtrs/1.5 Mtrs/1.4 Mtrs up to max 2 Mtrs Length: 10 Mtrs Long (Standard length) Thickness: 0.5 mm Thk to 50 mm Thick Customized size possible Operating temperature range: -45°C to 120°C

Rubber Pads
